As we understand that the eProject is a step-by-step learning environment that closely simulates the classroom and Lab-based learning environment into actual implementation. It is a project implementation at your fingertips!! An electronic, live juncture on the machine that allows you to.

- ✓ Practice step by step i.e. laddered approach.
- ✓ Build a larger more robust application.
- ✓ Usage of certain utilities in applications designed by user.
- ✓ Single program to unified code leading to a complete application.
- ✓ Learn implementation of concepts in a phased manner.
- ✓ Enhance skills and add value.
- ✓ Work on real-life projects.
- ✓ Give a real-life scenario and help to create applications that are more complicated and useful.
- ✓ Mentoring through email support.

We would like to send a great thank you to our professor and other students for the adorable support during the time of the project.

Besides several mistakes we had made in the project, we hope to have more opportunities to widen our knowledge in the web developing world.

We also thank you so much for your information and the “demo” project from India APTECH to help us get more real experience in this project. Since we have gained more experience from this project, we will not stop learning anything as much as we can to be more successful in the future.

Yours Sincerely,

Team Group 01.

Synopsis

The Objective of this program we aim is to give a sample project to work on real-life projects. These applications help us build a larger more robust application.

The objective is not to teach us HTML/JavaScript but to provide us with a real-life scenario and help us create basic applications using the tools.

Hence, we can revise the chapters before we start with the project.

This project is meant for students like us who have completed the module of HTML5. These programs should be done in the Lab sessions with the assistance of the faculty if required.

The website (in this project) is a tool that brings everything in the world to you such as historic monuments information natural knowledge and skill in technology...

It is very essential for us that will have a clear understanding of the subject. We think we should go through the project and solve the assignments as per the requirements given.

And get back ***eprojects@aptech.ac.in*** as the assigned schedule.

Problem Definition

GRACIOUS GARMENTS is selling various types of GARMENTS for both MEN and WOMEN. The company advertises by distributing the pamphlets, advertising on Television, and so on. Due to rapid development in the internet field, the company decides to launch a website where people will get all the information about the various products available to them easily.

Requirement Specification:

The Web site is to be created based on the following requirements.

1) The Home Page should be created using Frames with a suitable logo.

2) Home Page should contain details of different Garments with suitable images.

3) The site should display a menu that will contain the options for brief introduction about the various garments available, the location of the shop and any other information if required.

4) The information should be categorized according to the brand names of the products like if a user wants to see only “Van Heusen” products or any other companies products then he/she can click on a link/button/menu etc and can see only that Brand products.

5) When a user selects any particular brand, a list of products for that brand will be displayed

6) A brief summary of features of individual products should be displayed on the Web Page along with the product but detailed Features should be stored in Individual Word documents which can be downloaded or viewed by the User who wishes to see the same.

7) The user should also be able to compare the various products of different as well as similar brands.

8) There should be a “Contact Us” page which will have the Address of the Company which is as follows and the mail address which when clicked will invoke the local mail client from where they can send an email. Address of the Company should be displayed using Geo Location API (eg. GoogleMaps).

Customer Requirements Specifications

User:

input:

- Information on search.
- Data of registered members.
- Feedback to the webmaster.

Process:

- Find the searching
- Check the data of registered members.
- Check the feedback of users.

Output:

- Result of searching.
- Confirm the data of registered members.
- Confirm the feedback of the users.

Hardware/ software requirement:

Software:

- Notepad/HTML editor
- Dreamweaver
- IE 5.0/ Netscape 6.0

Hardware:

- A minimum computer system that will help you access all the tools in the courses is a Pentium 166 or better
- 64 Megabytes of RAM or better

Architecture and design of the project

Screen shots

I. Homepage

Description

Homepage displays the following information:

- Slide show collection, services, and promotions.
- Best seller product.
- New arrival product.
- Our Blog.
- Some information about the website.

	Prepared by (Student)	Approved by (Faculty)
	Project Group No: 01	
Signature		
Date		

II. Shop

Description

This shop page displays the following information:

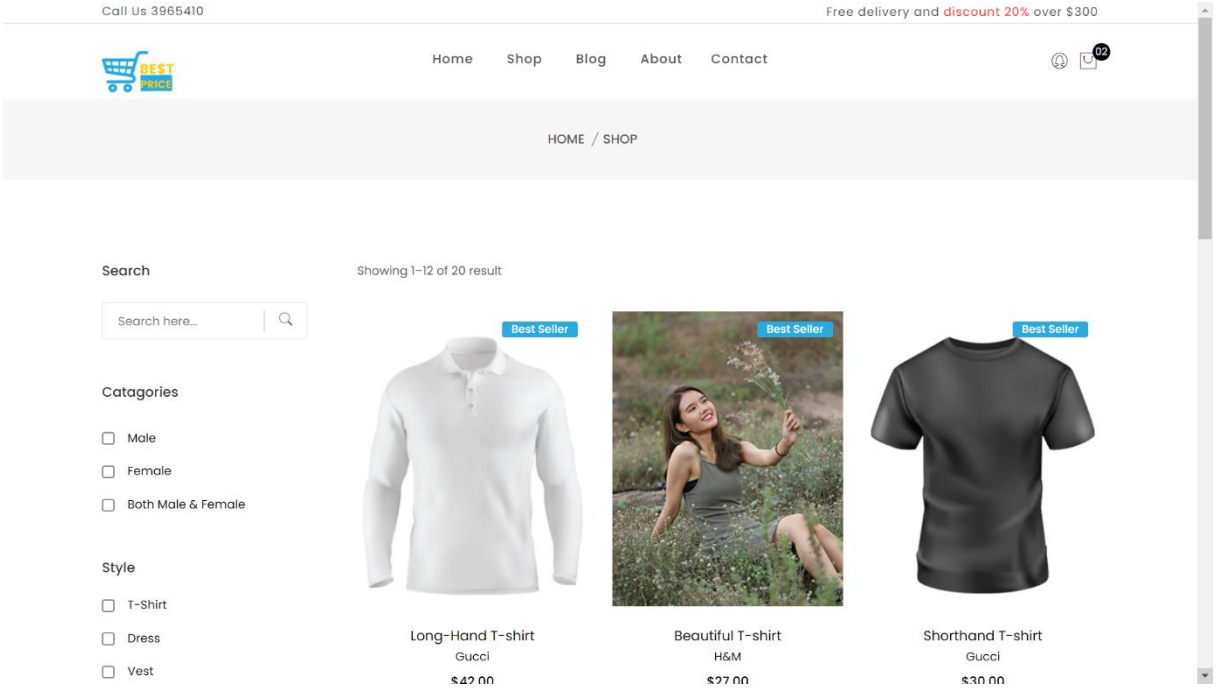
- All products that are sold at Shop when clicking on the product, will show the detail of that item.

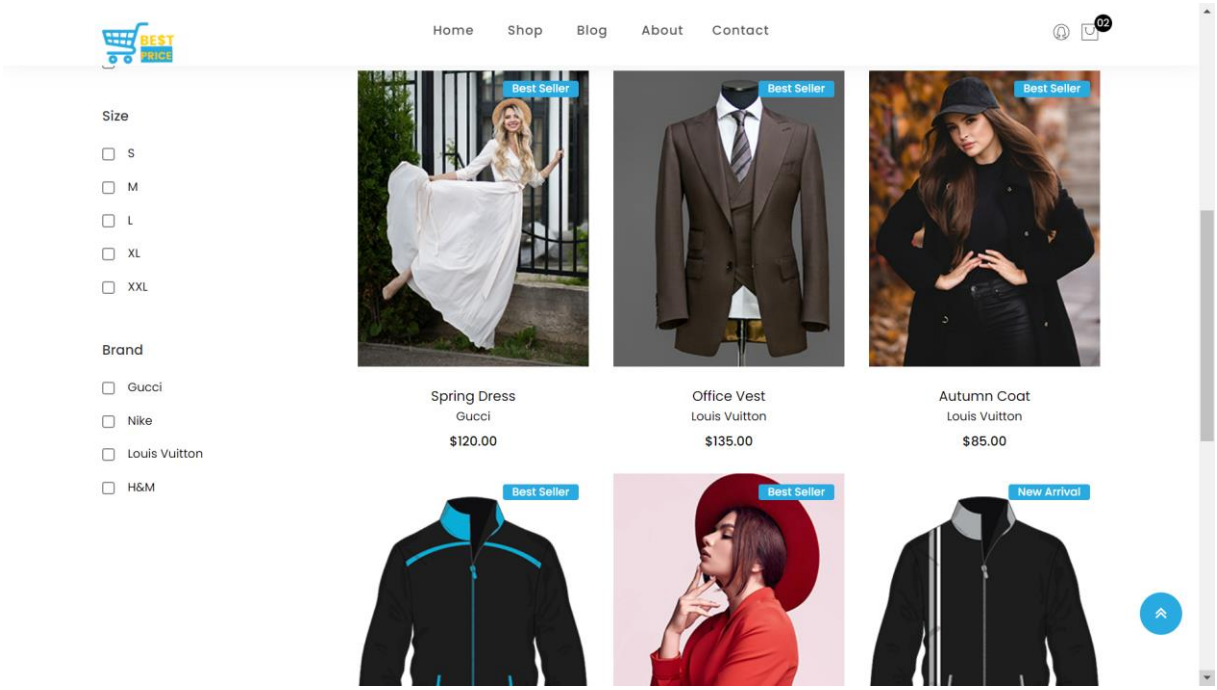
- Products can be compared with products of the same category.

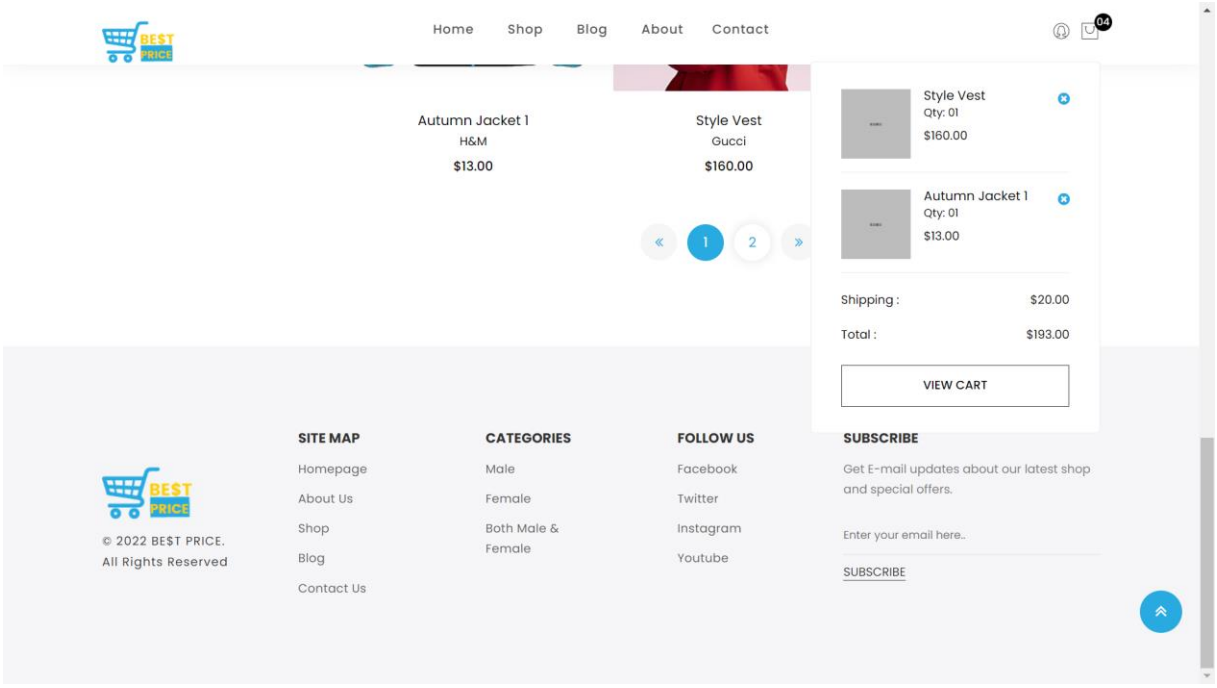
- Menu filter to easily find items based on Categories, Style, Size, and Brand.

- Product can sort by name.

- Product can add to cart, and will popup in navbar.







III. Shop Details

Description

	Prepared by (Student)	Approved by (Faculty)
	Project Group No: 01	
Signature		
Date		

This shop page displays the following information:

- Show the detail of that item.

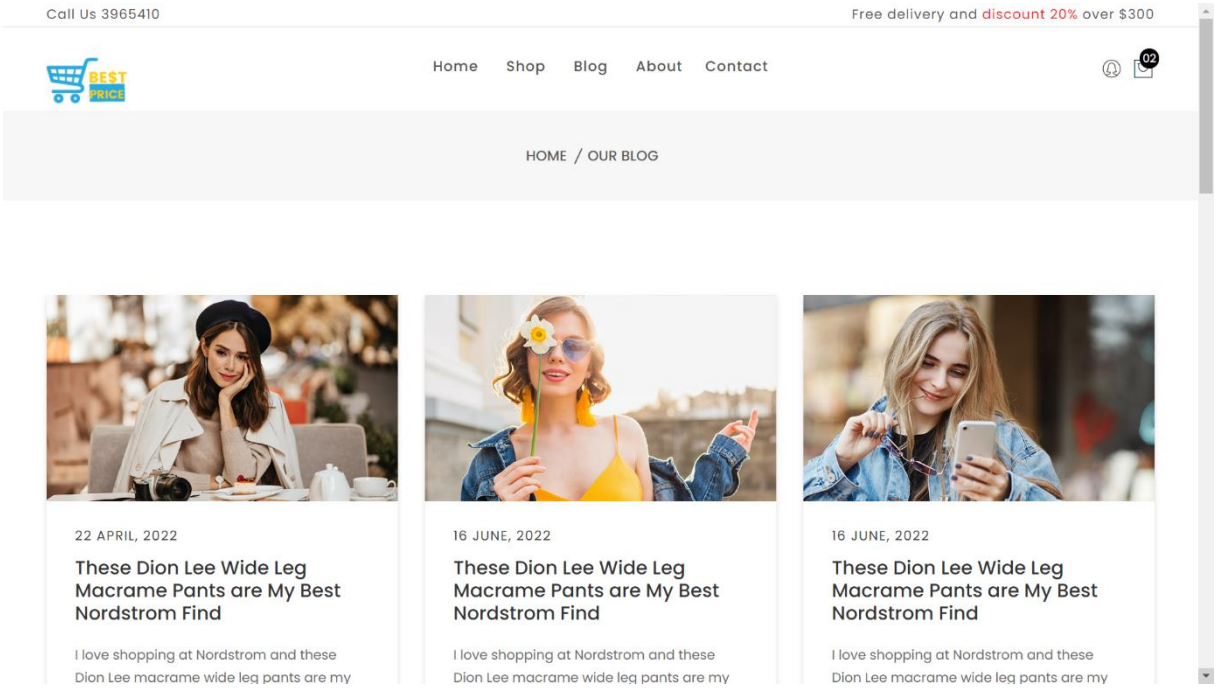
	Prepared by (Student)	Approved by (Faculty)
	Project Group No: 01	
Signature		
Date		

IV. Blog

Description

The blog page displays the following information:

- News.
- Style blog.
- Events.

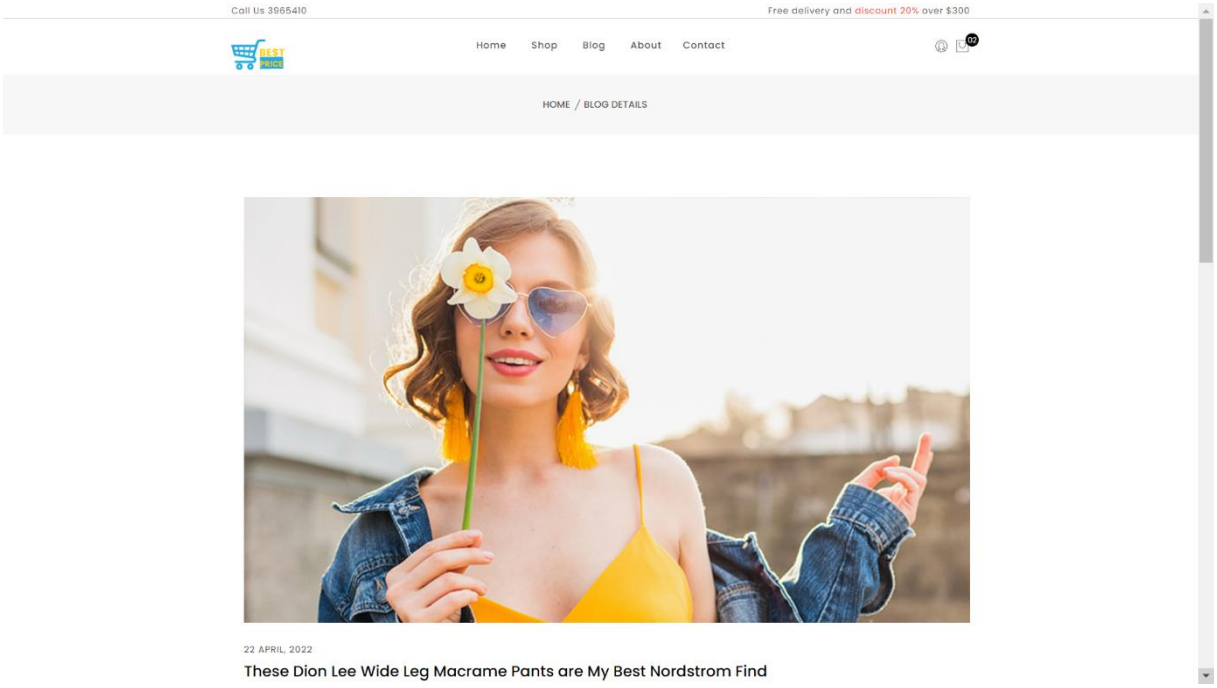


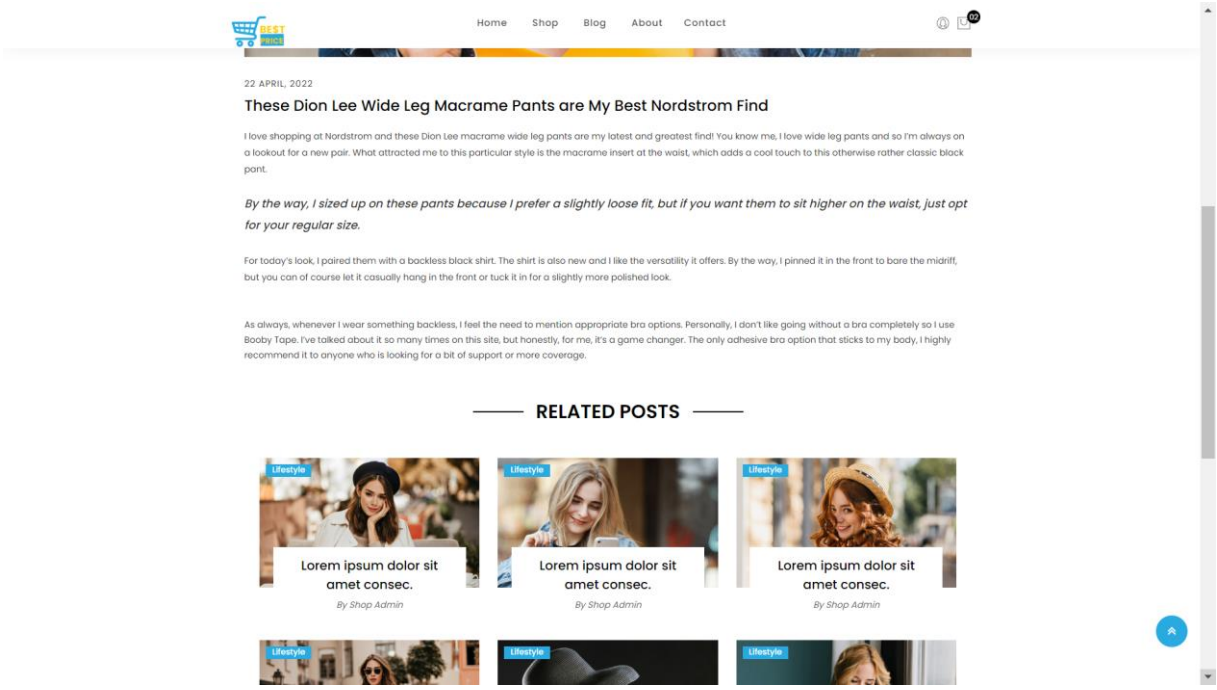
V. Blog Details

Description

The blog details page displays the following information:

- The details of the blog.
- Relative blog.



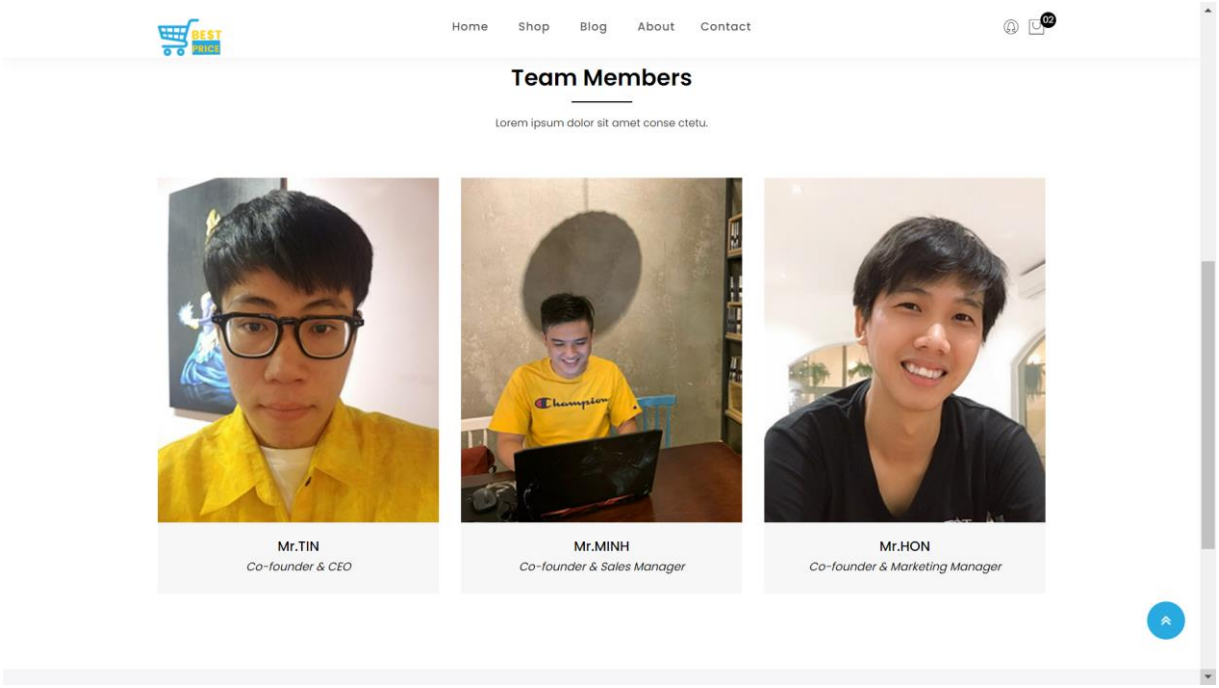


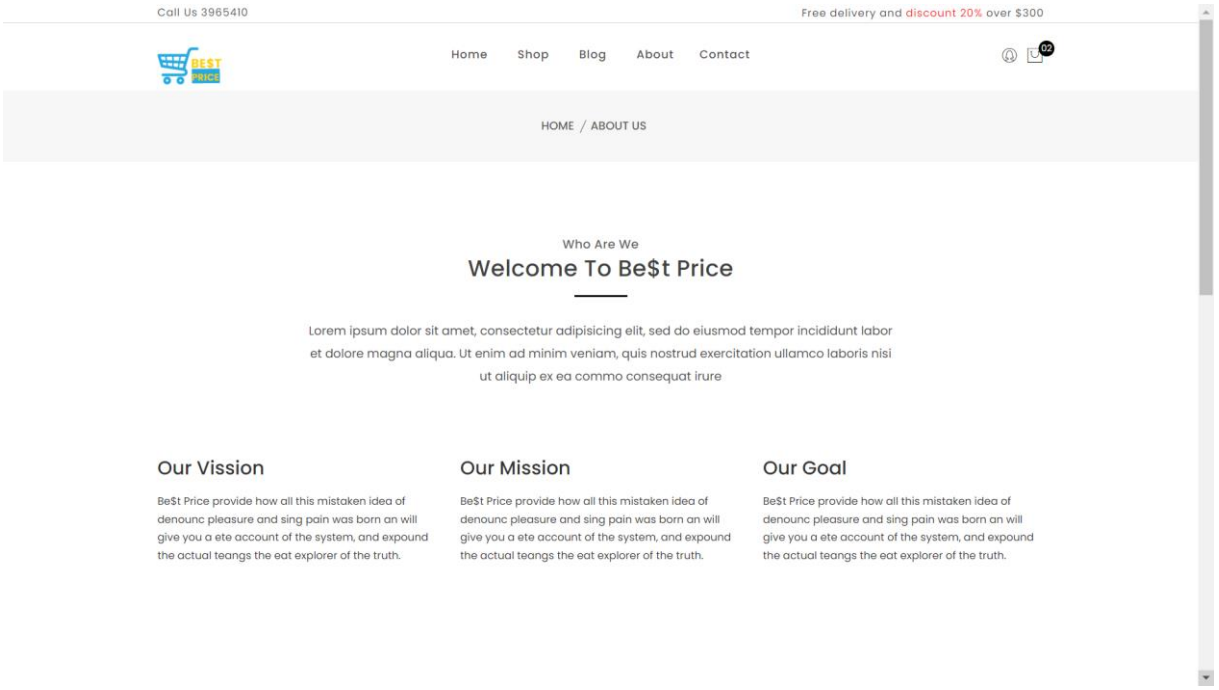
VI. About us

Description

	Prepared by (Student)	Approved by (Faculty)
	Project Group No: 01	
Signature		
Date		

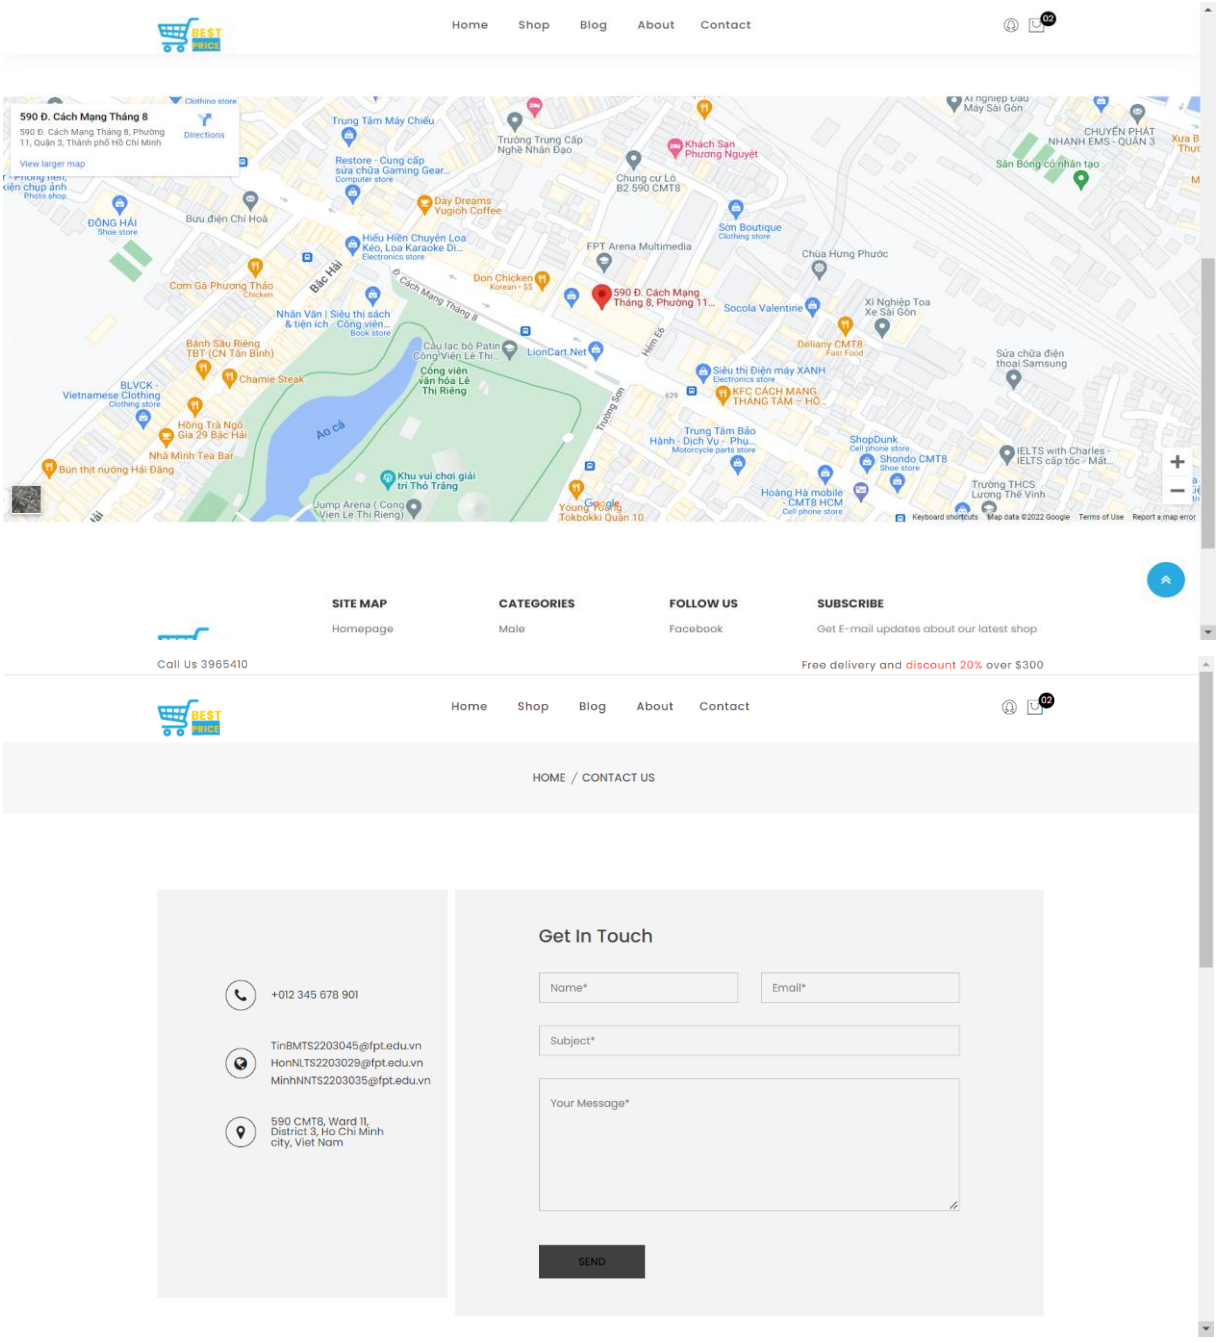
- This page displays information about our vision, our mission, our goal, the service that we provide, and our team members.





VII. Contact

This page displays contact information: location, telephone number, email and a quick contact form for customer.



VIII.Login/ Register

This page displays login/register information: username, password, email

Final checklist

Sr.No	Aspected Tested	Suggestion/ Remarks
1	Are all the users able to view the images and links?	YES
2	Have all the views, modules and controllers been properly integrated and is the site function as a single page application?	YES
3	Are the GUI content devoid of spelling mistakes?	YES
4	Is the application user-friendly?	YES
5	Is the Website launching correctly in all popular browsers?	YES
6	Are all the forms validated with proper criteria?	YES
7	Do all text links lead to the appropriate website?	NO
8	Do all image links lead to the appropriate website?	YES
9	Are all the images and links clearly visible on the page?	YES
10	Does the Web page work properly in all the tested browsers?	YES
11	Does the Web page take too long to be loaded fully?	NO
12	Is the navigation sequences correct through all the Web pages on the site?	YES
13	Is the JavaScript code working as expected in all click events?	YES
